The Power of Sound and Light Providing "A Unique Service for a Unique You"

Thank you for your interest in Custom Mobile D.J. Techniques. In just a few short paragraphs, we will give you a basic overview of our company and the services we offer. For more information, check out our web site at www.cmdjtech.com. You can check with our representatives directly by calling our business office anytime at (217) 733-2301, or you can call a D.J. Event Specialist direct at (217) 637-2634. We are available for no obligation consultations at your convenience.

Custom Mobile D.J. Techniques is a full service Mobile Entertainment company. We offer a wide range of services sure to give you the unique experience that you are looking for. Based on your requirements, we can design the entertainment portion of your event to be the hit of the evening. From the smallest birthday parties, to the largest corporate functions, to the most elegant weddings, Custom Mobile D.J. Techniques offers you the right equipment, with the right service, to insure that you get the event you and your guests will remember.

Our D.J.s, Master of Ceremonies, and Hosts, provide the right atmosphere for your event. Want a wild Party? We have a personality perfect for that. Have a corporate function that requires a professional presentation and introduction commensurate to your company image? We have the right person for that. How about a Master of Ceremonies who will present the right formal impression for your wedding? We have a person for that. Want a professional Host for your party? We can provide that service too. In fact, we have the right person with the right personality for almost any event. We match the personality and appearance of our professionals to your event, based on your needs. Our goal is to provide you with only what you need. We do not have a one size fits all program that is a "take it or leave it" service. We are professional enough to care about, and cater to, your needs "Providing a Unique Service For a Unique You", always.

Our equipment contains some of the latest in up-to-date technology. We upgrade our equipment on a rotation schedule. Our equipment always LOOKS GREAT, and SOUNDS GREAT. You will not find shabby speaker cabinets, bad sound from over used and over amped equipment, cheap lighting, or any non professional equipment in service. We are constantly looking for ways to make our equipment the best in the industry. With names like; Peavey, Yamaha, Cortex, Phonic, Sony, Toshiba, Mac, Monster, Behringer, American D.J., Ikey, Chauvet, and many, many, other great names in the industry, it is easy to see, we are serious about providing entertainment of the best caliber. We use quality equipment to insure the best results for you.

Not only do we offer sound reinforcement equipment, but we also have a massive amount of lighting options available for your event. From lighting to provide a subtle glow of color like “up lighting” for walls and ceilings, to light shows that rival your favorite club scene. We can set up the perfect mix for your event. By talking with your Custom Mobile D.J. Techniques’ representative, you can choose the mix and ambience of the lighting you want for your event. Monograms, family names, corporate names and more can be setup and projected to floors, ceilings, and walls, making your event even more of a representation of you or your company.

We also offer a wide variety of laser based lighting. Would you like to dance under the stars in the middle of winter? Or serve your guest their meal “under the stars”? We have a laser available to project a beautiful star field on a ceiling or upper wall. Laser imaging of names and logos are also available. With lasers, we can provide a sunrise effect for your event. Laser and lighting technology is changing fast. Check with your Custom Mobile D.J. Techniques’ representative to discuss the latest in lighting and laser technology that is available today.

To give you a basic overview of services offered, we have listed a few of the major points below. Please understand, this is not complete. We offer much more than we can list here. If you don’t see what you are looking for, ask your Custom Mobile D.J. Techniques’ representative if we can provide what you need.

Basic D.J. Services

Our basic D.J. services offers a professional D.J. providing services based on your requirements. These professionals provide important information at the right time, perform introductions as needed, “read the crowd” to insure the right music or entertainment is being performed, insure that the evenings events flow smoothly, and perform any other services needed to have your event go as planned.

Master of Ceremonies

A Master of Ceremonies gives an event a more interactive and controlled professional approach. The Master of Ceremonies, or M.C., provides a direct interaction with the guests. The M.C. will be directly involved with what is happening throughout the night. Like the D.J., the M.C. will provide all services based on your requirements. The M.C. will provide important information at the right time, provide introductions, “read the crowd”, insure the flow of the evening, and of course, the music, and any other services required. Additionally, the M.C. can set up games, coordinate special events, and choreograph those special moments that make your event yours.

Host

The Host is the best of all worlds. A host is especially good for more personal events like weddings, birthday parties, Mitzvahs, bachelor and bachelorette parties, and other special events where you need someone to be the host, to allow you to mingle with your guest and enjoy the party. A Host becomes the “Go To” person at your event. A Host can help answer questions, direct people to where they need to be, provide personalized individual services to each and every one of your guest. The Host

can still perform all of the duties that the D.J. and M.C. perform, but take it to the next level. Make no mistake, the Host coordinates the event on so many levels that it is hard to do without one once you have experienced the freedom that having a professional Host can provide.

Sound Systems

We have eleven (11) different basic sound system configurations available to choose from. Our systems are Peavey or Yamaha based systems. From an intimate household party, to a stadium or a stage, we have a system that will work for your event. We have system configurations that will blend in to your décor, or ones that have the look and sound of a stage show or club house. Keep in mind, not all systems are your best choice for your event. Your Custom Mobile D.J. Techniques' representative will offer guidance to the best configuration for you, your event and your budget. Rest assured, Your Custom Mobile D.J. Techniques' representative will never "sell" you a system, but we do know our equipment, and will give you all the information you need to make your own decisions based on your own visions.

Lighting

There are so many kinds of lighting available for you to choose from, that we can't list it all here. We offer ambient lighting, "up-lighting" for walls and ceilings, spots, floods, moving lights, High intensity lighting, lasers, rainbow effects, star fields, monograms, names, flashing lights, intelligent lighting, and our list is growing as the technology changes. Check us out to see what we have added lately. The options are absolutely fantastic, and practically unlimited.

Music

Like most D.J.s you talk to, we have all the latest music out there, and like most of the other D.J.s, we have most of the "top Hits" from the 60's through today. But, unlike most of the other D.J.s out there, our "top hits" go all the back as far as the 20's, and beyond. Not only that, our music isn't just "top Hits", but rather an eclectic mix of artist, music styles, genres, and song titles that most other D.J.s don't even know about, let alone carry. This can be useful if you theme a party to a music genre like, say, Polka. We have a full evening's worth of Polka, and it's not all Frank Yankovich, or 1,000 versions of "Beer Barrel Polka", and "The Chicken Dance". Would your Grandma like to hear the song she got married to? We might actually have it! Check out our web site for a basic list of available songs. Then, when you secure your date with us, ask us for a disc of music titles not yet published on the web site. We have well over 100,000 songs, and more are being added weekly. If you don't see your songs on our list, we will attempt to add your special request to our list. It's all about having the right music for your event.

Music videos

We have a large collection of Music Videos on hand, and the list is growing all the time. We have many of the Music Videos that you see on your favorite Music Video T.V. stations. We also have artist compilations, video albums, concert performances, and more. Ask your Custom Mobile D.J. Techniques' representative about what we have to offer, and what might be right for your event.

Photographic and Video Montage

This is a system set up that allows us to present your video montages, digital photos, video clips, home movies, previous event videos (like a wedding ceremony), to your guest. Certain requirements, concerning compatibility of equipment and video, need to be met to assure proper playback and presentation. Your Custom Mobile D.J. Techniques' representative can help you get the right media for our equipment.

Video Projection and Screens

We can use projection technology to provide an image that can be seen throughout the room. This is a great technology for light ambient conditions, or auditorium settings. The brighter the room, the less suitable this option is. For rooms that are to be brightly lit, we recommend the LCD Monitor System listed below. Check with your Custom Mobile D.J. Techniques representative on which system is best for your application.

LCD T.V. Monitors

We currently have two (2) 46 inch LCD Monitors / T.V.s available. You can choose one or both for your event. These provide the best visual display to present your montages, our music videos, or anything else requiring visual projection or display.

Fog

We can provide fog for any event where the venue has approved the use. Some venues fire alarm and suppression systems do not react well to fog. If this is something you must have, choose a location that will allow it.

Bubbles

We have bubbles available. This service is great for outdoor events, and some indoor events. Like fog, some venues would prefer you not to use bubbles at their location. It is recommended that the use of bubbles should be limited to appropriate areas and circumstances. Check with your Custom Mobile D.J. Techniques' representative to see if this is for you.

Karaoke

Karaoke is a service that can be a stand-alone event in its self, or as an add-on on to many other events. This interactive system allows the guest to become the entertainment. Usually, this form of entertainment is best reserved for general parties where there is not a conflict in objectives. Karaoke can "steal the show" at events like weddings. Be sure to talk to your Custom Mobile D.J. Techniques' representative if you want to add this to your program or event mix.

Guitar Hero and Rock Band

Like karaoke, Guitar Hero and Rock Band can steal the show at events like a wedding. There is also the issue of entertainment value for the guests who will observe the show. As a stand-alone event, this can be a fun party, but as an add-on, it depends on your guest. This is a great add-on if there will be another room to set this up in. That way, you can give the kid's something fun to do while the parents dance in the next room.

Television Game Show Systems

We currently offer several T.V. style games (like jeopardy, family feud, etc.), that provide a lot of fun for everyone. Electronic consoles providing scoring, sound effects, and features that allow them to operate much like your favorite game shows on T.V.. These games can be set up for just about any event, done properly and judiciously. These can be set up as stand-alone entertainment as well. Game Shows provide great fund raising opportunities for Schools, Churches, and Charities. Talk to your Custom Mobile D.J. Techniques' representative to find out more about these unique systems, and how they can work for you.

In closing, remember, you can always contact your Custom Mobile D.J. Techniques' representative with any questions you have concerning your event entertainment. We are always here to help you have "the event of a lifetime" every time. Call us today to secure your event date, and start planning your event now.
